### **AASHTO Brite Blend Performance Beads**

- **According to AAA, the average driver requires 3 seconds to identify and respond to changing situations while operating a vehicle under normal circumstances.**
- **At 70 miles per hour a vehicle travels 308 feet in 3 seconds.**
- **A white 4" wide line on new asphalt with a 100 mcd reading gives a 40 year old average driver 3 seconds of reaction time at night, in a car with low beam headlights, traveling at 70 miles per hour.**
- **For an average 60 year old driver that time drops to 2.8 seconds.**
